Sechelt Aquatic Centre – Further Closure of Main Pool

Sechelt, BC—April 12, 2022— Due to an ongoing issue with pumps, the main pool at the Sechelt Aquatic Centre will remain closed for the next two days (Wednesday, April 13 and Thursday, April 14).

Since the initial issue with the pumps was first identified on Monday, staff have been working to source replacement parts and schedule in contractors to assist with the work needed to fix the pumps.

The SCRD understands that this closure is frustrating to pool users however this vital work must be completed in order for the main pool to reopen. We appreciate your patience at this time.

The leisure pool, sauna, waterslide, hot tub and weight room remain open as usual.

A further update on the status of this closure will be provided on Thursday afternoon. SCRD staff are also reaching out directly to user groups and any registered programs that are affected by this closure.
