Sechelt Aquatic Centre Update – Main Pool Remains Closed

Sechelt, BC—April 20, 2022— Work is continuing to repair pumps for the main pool at the Sechelt Aquatic Centre. Parts for the pump were purchased late last week, however the parts have yet to arrive on the Sunshine Coast from the supplier.

As this vital work has not been completed, the main pool must remain closed at this time. An update will be provided later this week once further information is available on the status of the repair work. The SCRD understands the inconvenience this is causing and staff are doing all they can to ensure the main pool can reopen as soon as possible.

The leisure pool, sauna, waterslide, hot tub, steam room and weight room remain open as usual.

Updates will continue to be provided via news releases, on the [Sechelt Aquatic Centre](#) webpage and on the [SCRD's Facebook Page](#).
