2. INTRODUCTION

2.1 Purpose

The SCRD fire departments, consisting of: Gibsons & District, Roberts Creek, Halfmoon Bay and Egmont Volunteer Fire Departments are seeking proposals for a Fire Department Software (FDS) solution.

3. SITUATION/OVERVIEW

3.1 Background

The SCRD is the regional government serving the residents of the lower Sunshine Coast. The SCRD has four fire departments, each of different sizes ranging from 15-43 members, servicing a population of 29,970 between them.

The SCRD Fire Departments used “Project FIRES”, an E-Comm 911 hosted records management system, until 2015. Currently each department uses individual software solutions and/or paper based record keeping. A new, consistent software system to track personnel, equipment, emergency events, inspections, pre-fire plans and training is desired.

SCRD maintains an electronic document and records management system (EDRMS) – Content Server from OpenText - to manage all of the SCRD’s Records, regardless of the media. Records Management is governed by SCRD’s Records and Information Bylaw No. 674 and the Records Management Program. SCRD has a requirement that all Records reside in the EDRMS repository.

The “Fire Department Software” sought in this RFP will not replace the SCRD’s EDRMS, nor the requirement for all records to be stored in the EDRMS repository. Instead, the “Fire Department Software” will provide the tools required by the fire departments to meet their local operational and legislative needs.

3.2 Project Objectives

Procure and implement Fire Department software in four rural Fire Departments, with solution support including training.

3.3 Scope

The goal of this RFP is to identify current market offerings of fire department software (FDS) for the fire department industry and evaluate it against the needs of the SCRD fire departments.

The scope of work included in this RFP will be to supply, install, provide training for, and ongoing support of the software solution for the duration of the contract.

Each department requires a minimum of two user licenses, preferably with adjustable access levels.

The fire department software will be located at four locations on the Sunshine Coast: Gibsons, Roberts Creek, Halfmoon Bay, and Egmont.

4. CONTRACT

4.1 General Contract Terms and Conditions

Proponents should review carefully the terms and conditions set out in the General Service Contract, including the Schedules. The selected Proponent will be requested to enter into direct contract negotiations to finalize an agreement. The terms and conditions found The General Contract terms can be found at: [GSA Terms and Conditions.pdf](#) and are to form the basis for commencing negotiations between the Regional District and the selected Proponent.

4.2 Term

The duration of the contract will be for five years with a potential for extension of up to five years following a contract performance review. Support and maintenance is required to be available throughout the duration of the service.

4.3 Service Requirements

The Contractor's responsibilities will include, but not be limited to the following:

- a) Supplying the software with the following modules:
 - i. Personnel
 - ii. Emergency Events
 - iii. Training
 - iv. Inspections
 - v. Prefire Plans
 - vi. Equipment
 - vii. List any other optional modules.
- b) Provision of licenses, making note of adjustable license access levels
- c) Customization to meet SCRD needs (if applicable)
- d) Hosting or storage of data in conformance to all applicable legislation; notably, that all data required will be stored in conformance with SCRD Records Management standards
- e) Implementation of software
- f) Training on software use

Excluded items:

- a) Any hardware (e.g. Computers, tablets, laptops, etc)

5. REQUIREMENTS

In order for a proposal to be considered, a Proponent must clearly demonstrate that they meet the mandatory requirements set out in Section 7.1 (Mandatory Criteria) of the RFP.

This section includes "Response Guidelines" which are intended to assist Proponents in the development of their proposals in respect of the weighted criteria set out in Section 7.2 of the RFP. The Response Guidelines are not intended to be comprehensive. Proponents should use their own judgement in determining what information to provide to demonstrate that the Proponent meets or exceeds the Regional District's expectations.

Please address each of the following items in your proposal in the order presented. **Proponents must format their proposal response using the headings below per Section 7. Failure to do so may result in disqualification from the review process.**

Timelines are preferred in number of days vs. tied to a calendar date (e.g. Training 10-15 business days vs. Training November 1-20).

5.1.4 References

Proponents **need to** provide a minimum of **3** references (i.e. names and contact information) of individuals who can verify the quality of work provided specific to the relevant experience of the Proponent and of any subcontractors named in the proposal. References from the Proponent's own organization or from named subcontractors are not acceptable.

The Regional District reserves the right to seek additional references independent of those supplied by the Proponent, including internal references in relation to the Proponent's and any subcontractor's performance under any past or current contracts with the Regional District or other verifications as are deemed necessary by it to verify the information contained in the proposal and to confirm the suitability of the Proponent.

5.2 Sustainable Social Procurement

5.3 Approach

5.3.1 FDS System Design

The Proponent shall demonstrate that their software will meet the following requirements required by the SCRD:

1. Data management: Explain or demonstrate how data is entered and stored. How is it retrieved? What are the search and filtering features? Can metadata fields be customized or new ones added? How does the system ensure information integrity? Is there an audit trail?
2. Records management: Explain or demonstrate what the Proponent means when using this term, if the Proponent uses it in relation to their software. Can holds be applied? Are there disposition capabilities?

3. Report Generation: Explain or demonstrate how the software will generate and organize information in an efficient manner (e.g. Are reports limited to prescribed layouts or are they customizable?)
4. Incidents: Explain or demonstrate how incident types are input. (e.g. Is this an item that users can update as required or will this only be able to be updated by the service provider?), is there potential automated integration with E-Comm
5. Preventative maintenance: Explain or demonstrate how the software manages maintenance records of equipment and how preventative maintenance reports are generated
6. Inspections: Explain or demonstrate how the software manages inspections and what reports can be generated regarding them
7. Permits: Explain or demonstrate how the software manages permits and what reports can be generated regarding them
8. Training and Development: Explain how the system tracks, records and reports.

If any information is Cloud stored, the Proponent **must** demonstrate how storage will meet Canadian jurisdictional requirements for public organizations. Proponent should also outline what would be required to transfer the SCRD's data to another cloud service provider if the business relationship with the SCRD was terminated.

5.3.2 Implementation Strategy

- in Canadian dollars ;
- inclusive of duty, FOB destination, and delivery charges where applicable; and
- exclusive of any applicable taxes.

The Proponent shall outline their pricing as follows:

- a) Initial System Implementation, including all costs associated up to system operation and training.
