## Item No.1

**Question:** Can you provide us the model number and specs of the current Irwin fill station so that we can see if it is possible to upgrade any of the components from low pressure to high pressure 4500 psi? I know the fill station is quite old and I'm not 100% sure if it will be possible or not.

**Answer:** The HBFD is not currently looking for an upgrade, but a replacement unit. The year of the unit is unknown but it is over 25 years old and it currently has 896 hours. Here is a picture to reference removal and possible trade in value.
