

# OPEN HOUSE

## Chapman Creek Source Assessment Response Plan

The Chapman Creek watershed supplies drinking water to roughly 90% of the residents on the Sunshine Coast.

To enhance the protection of this invaluable resource, the Sunshine Coast Regional District is working with the Vancouver Coastal Health Authority to develop a watershed management plan under the Drinking Water Protection Act legislative process.

To date, this process has included a watershed risk assessment that identified and rated the hazards to drinking water quality, the formation of a Technical Working Group committee consisting of First Nations and stakeholders in the Chapman watershed, and the development of a draft Chapman Creek Source Assessment Response Plan (SARP) that specifies management measures to mitigate the hazards identified in the risk assessment.

The SARP consists of a set of actions that, once implemented, will ensure that the risks to drinking water quality within the Chapman Creek watershed are minimized.

The Chapman watershed is a critical community resource, and we want to hear your thoughts on this important document. Please visit [www.scrd.ca](http://www.scrd.ca) for more information and to view a copy of the draft SARP.

### OPEN HOUSES

Two Open Houses will be held on **Saturday, February 4, 2012** to present the draft SARP and receive public feedback.

10:00 a.m. to 1:00 p.m.  
Sechelt Indian Band Hall  
5432 Xenichen Avenue  
Sechelt  
(Behind Ravens Cry Theatre)

3:00 p.m. to 6:00 p.m.  
Gibsons and Area Community Center  
700 Park Road  
Gibsons
