British Columbia Tsunami Notification Zones

Tsunamis are rare, but serious events. Many areas of coastal B.C. may be threatened in the event of a tsunami. However, it is generally accepted by scientific and technical experts that Victoria, eastern Vancouver Island, Vancouver and the lower mainland are low risk areas.

To ensure that all B.C. communities receive appropriate messaging, that is easily understandable using provincial landmarks, Emergency Management BC has divided the province into five (5) zones for notification purposes. These zones are reflected on this map in different colours.

All tsunami notifications prepared by the Province will refer to these five zones. Each of the five designated zones includes all islands and inlets within the location descriptive.

	ZONE A – NORTH COAST AND HAIDA GWAIL
	ZONE B – CENTRAL COAST AND NORTHEAST VANCOUVER ISLAND COAST (INCLUDES KITIMAT, BELLA COOLA, AND PORT HARDY)
	ZONE C – THE OUTER WEST COAST OF VANCOUVER ISLAND (FROM CAPE SCOTT TO PORT RENFREW)
	ZONE D – THE JUAN DE FUCA STRAIT (FROM JORDAN RIVER TO GREATER VICTORIA INCLUDING THE SAANICH PENINSULA)
	ZONE E – THE STRAIT OF GEORGIA (INCLUDING THE GULF ISLANDS, GREATER VANCOUVER AND JOHNSTONE STRAIT)
