

# CHASTER WELL IMPROVEMENTS

## Notice of Construction Work – Week of June 16

Location: 256 Knight Road, Gibsons

The Chaster Well is a backup water source for the Chapman Water System. Upgrades will help prevent future disruptions and maintain current levels of service.

### PHASE 1 – WELL REHABILITATION

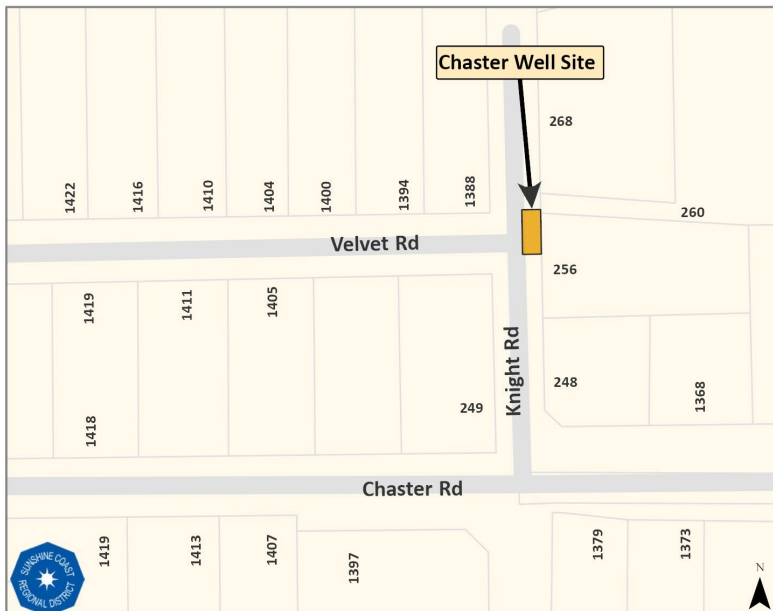

Phase 1 is scheduled to begin the week of June 16 and is expected to be completed by the week of July 14, 2025.

This phase involves rehabilitating the Chaster Well to improve its water flow and overall performance in preparation for upcoming construction.

### PHASE 2 – CONSTRUCTION

Phase 2 is expected to begin in mid-July.

It will include the installation of a new pump and motor, mechanical upgrades at the site, and the fabrication and installation of new electrical systems.

## IMPACTS TO RESIDENTS

Disruptions will be as minimal as possible.

However, to complete the project safely and quickly, there will be some traffic delays, temporary road closures, and occasional water shut-offs.

Residents affected by road closures or water shut-offs will receive advance notice.

People living near the work area may notice some minor inconveniences, such as noise, dust, vibrations, and construction vehicles.
